Dodge Truck Adapter Harness

Certain Fuel Pump Assemblies that fit Dodge trucks applications (1996-1997) have an adapter harness included with the replacement assembly to plug into the original vehicle wiring harness.

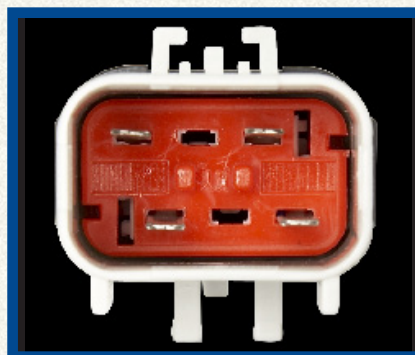

The replacement adapter harness has a 4-pin connector when compared to the original Fuel Pump Assembly that is a 6-pin connector. Although the original Fuel Pump Assembly only uses 4 of the 6 pins in the connector.

The replacement adapter harness and the OE vehicle harness differ in appearance; although will perform to OE fit, form and specification.

Old Model Connector

New Model Connector

Part #	Applications
SP6140M	Dodge Ram Pickup 1997-1996 V6 239 (3.9L); V8 318 (5.2L), 360 (5.9L); V10 488 (8.0L)
